

CRAFT OF THE MONTH

JULY 2010

HOW TO MAKE.....

SENSORY BOTTLES

1. LAVA BOTTLES: fill $\frac{1}{2}$ with water and food colouring, and $\frac{1}{2}$ with baby oil. It produces a lava lamp effect when tilted.
2. SNOW GLOBES: fill $\frac{1}{2}$ with water and half with corn syrup. Add glitter, beads, paper clips etc. The corn syrup makes the glitter fall slowly for dazzling effects.
3. DISCOVERY BOTTLES: fill with rice and small objects like dice, small toys, paper clips, beads etc. As you roll the bottle, different objects will come to the surface to be discovered.

You can add food colouring to any of the bottles.

Once filled, simply replace the lid tightly and add some tape to reinforce.

HAVE A GO AT MAKING UP YOUR OWN IDEAS.
